

Digital Therapeutics

Mobile Health's New Product Line

Introductions

Al Wright - Chief Product Officer

Davinder Rehal - Vice President of Design & User Experience

D'Arcy Loeb - Director of Content

Dr. Monique Thompson - Therapist, Author, Educator

What are digital therapeutics (DTx)?

“Digital therapeutics (DTx) deliver evidence-based **therapeutic** interventions to patients that are driven by high quality software programs to users that prevent, manage, or treat a medical disorder or disease.

They are used **independently** or in concert with medications, devices, or other therapies to optimize patient care and health outcomes.

They are **validated** by regulatory bodies as required to support product claims regarding risk, efficacy, and intended use.”

Mobile Health's Digital Therapeutics

Mobile Health's Digital Therapeutics (DTx) deliver evidence-based therapeutic interventions to users that prevent, manage, or treat the following conditions:

Diabetes, Anxiety, Depression, Insomnia, Musculoskeletal, Hypertension and Pregnancy

We will leverage our evidenced-based digital health content, healthy habit design for behavior change, medical advisors (experts in their field & medical research), plus the best incentive capability in the industry.

We will provide proven therapies, daily health goals / habits, as well as skill-building tools integrated into user's daily life that engage, record, reinforce, and reward behavior change so our users can improve their condition.

Mobile Health's DTx Success Criteria

Users will experience easier, more timely, and less intrusive methods to get therapeutic help for their key medical conditions.

Customers will have less expensive as well as **simpler** and **integrated** therapeutic solutions that can be accessed by larger populations by replacing multiple point solutions.

Mobile Health will incorporate industry-leading wellbeing content, user experience & rewards along with our Incentive Engine and Personalization functionality

Why DTx is a good fit for Mobile Health

Industry leading evidenced-based digital wellbeing content library & scalable architecture

“Consumer-level” user experience & design for behavior change

Medical advisors expert in medical research

Best incentive capability in the industry

Current customers using point solutions that are motivated to transition to a single, comprehensive platform

Working together - next steps

 - b. Gap analysis
 - c. Final design & content
 - d. Innovations config + design feedback
6. Create sales demo

DTx vs Journey

Journey = Introduction to DTx topics

DTx = Therapy for a set period of weeks with demonstrable improvement for the user at the end of that time period

Ex - Back is sore. PT Assessment. Exercises for 3 weeks, if going well, add several exercises

MH Core DTx Status

Diabetes Prevention

- Initial content draft complete - needs updating & formatting into Journey 2.0

Behavioral Health

- Anxiety, Depression, Insomnia, (with Mindfulness baked in)
- Content sources identified and outline drafts complete

Musculoskeletal, Maternity

- Content sources identified

Hypertension, Weight Mgmt

- Content sources investigations

Wearables

MH Core DTx Schedule - on track

Sell Q1, Implement Q1 by Feb 28th 2022

- Diabetes Prevention, Behavioral Health, Musculoskeletal, Maternity (stretch)

Sell Q2 Implement Q2

- ChatBot UI & Device Integration - Diabetes Prevention, Behavioral Health, Musculoskeletal, Maternity, Hypertension, Weight Mgmt

MH DTx Decisions / Resource / Needs

Diabetes Prevention resource - in process

Davinder's UX in Dec/Jan- pending sales demos

Client advisors/customers (RTX & McGriff/Truist) - in process

Engineering for wearable integrations

Pricing (incl device costs)

MHC V1 DTx V1 - Launch in Q2 21

Core Services:

Risk Identification - Personalized Outreach - Rewards - Outcome Based Reporting

Data - Wearables

1. Diabetes - A1c (omada, livongo, solera)
2. Hypertension - BP Monitor (Whithings)
3. Weight - Scale (zipongo, Noom, Fitbit, Apple)
4. Mental Health - Mood Ring (Calm,
5. Musculoskeletal - (Hinge Health)

Getting it done

Jill/ D'Arcy/ Davinder/Steve - Agreement on Design, Approach, & Differentiation

D'Arcy - Organize / Align HH + 365C to WBJ

Davinder - UI for Combined Offering

Steve/Sales - Differentiation from market, Upsell Pricing

Jill / Innovations - Config & Test

Steve / Sales - Sell, Sell, Sell
