

Pay only when employees engage.

That's engagement-based billing.

Traditional PEPM models charge regardless of engagement. With Mobile Health's engagement-based billing, you only pay when employees engage - and we reward them for doing so!

TRADITIONAL WAY

Fixed PEPM regardless of engagement

Low engagement with unclear ROI

Extra admin, invoices, and budget headaches

A BETTER WAY

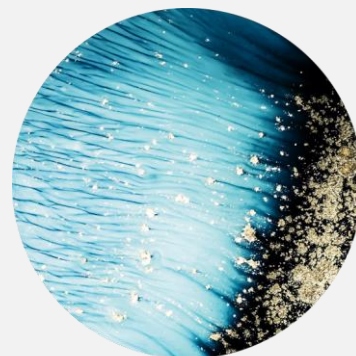

Pay via claims only when employees engage

You pay for outcomes, not access

Mobile Health funds the reward for engagement

Why engagement-based billing works.

- ✓ No engagement, no cost.
- ✓ Costs are directly tied to employee engagement in Digital Care Paths, helping reduce overall healthcare trend, compared to care accessed in the community.
- ✓ Clearer ROI driven by measurable, behavior-based outcomes.
- ✓ Eliminates or significantly reduces employer incentive budgets.
- ✓ No PEPM pricing—less administration, no financial lift.

Helping people live healthier, happier lives.
